PROFESSIONAL SUMMARY

Senior Unity C# Developer with 10 years of experience creating games since age 14. Expert in Unity UI systems (uGUI, Toolkit), complex system architecture, and optimization.

CORE COMPETENCIES

Unity UI (Toolkit/uGUI) Expert	C# Architecture Expert
Optimization & Memory Senior	Gameplay Systems Strong
Team Leadership Advanced	Networking Advanced

TECHNICAL STACK

Unity C# uGUI UI Toolkit IMGUI Canvas Responsive Design Animation Tweening
Particle Systems Shaders Git TeamCity UniTask Coroutines Jobs System Burst Compiler
Performance Profiling Memory Management FMOD Addressables Zenject VContainer ECS
MVP MVVM MVU MVC OOP SOLID Design Patterns Unit Testing Mobile Optimization
Console Dev Networking CI/CD Agile/Scrum Code Review ASP.NET .NET Framework React
WinForms WPF Visual Studio Rider

LANGUAGES

Russian Fluent	English B1+
Latvian A2	

WORK EXPERIENCE

Senior Unity Developer

Apr 2024 - Present

Perfect Play

Full-cycle feature development and CI/CD stabilization.

- Implemented key systems: Battle Route, MVP & Battle Stats (UI/Animations)
- Conducted Code/Lead Reviews and task decomposition
- Developed internal tools: cheat panels, MessagePack Viewer
- Optimized scripting, timers, and the build process
- Resolved critical bugs (NREs, freezes, crashes)

Senior Unity C# Developer

Sep 2022 - Nov 2023

Colossi Games

Development of Action RPG mechanics and engagement systems.

- Developed competitive ranking system
- Implemented Battle Pass system and its UI
- Created flexible perk system to deepen gameplay
- Developed dynamic event system for player retention
- Developed UI, player abilities, and editor tools

Senior Unity Developer

Oct 2021 - Jan 2022

Owlcat Games

Worked on the large-scale CRPG Warhammer 40,000: Rogue Trader.

- Developed console game systems in Unity
- Designed application architecture
- Wrote testing framework
- Conducted technical interviews

Senior Unity C# Developer

Jan 2020 - Oct 2021

tinyBuild

Hello Engineer. Refactoring and implementation of industry standards.

- Rewrote architecture, decoupling "spaghetti code" into independent modules
- Implemented Gitflow, Code Review, and CI practices
- Developed core mechanics (player state machine, network synchronization, UI)
- Managed sub-team (task decomposition, estimation)

C# Developer

Jul 2016 - Jun 2019

SKB Kontur

Developed desktop and cloud applications for user data migration.

- Developed desktop applications (WinForms and WPF) with intuitive interfaces
- Implemented cloud applications on ASP.NET for user data synchronization
- Frontend development using React for web interfaces
- Integrated various components to ensure reliable data migration

FEATURED PROJECTS

Warhammer 40k: Rogue Trader

AAA/CRPG | Senior Dev

Large-scale classic RPG. Contributed to the development of core architecture and systems.

Die to Play

Indie Roguelike | Lead/Solo

Personal project on Steam. Managed the full development cycle and team leadership.

Sharp Compose

Open Source | Author

High-performance C# UI framework utilizing the MVU pattern. Created custom UI system focused on performance and flexibility.

Hello Engineer

Construction/Action | Senior Dev

Machinery construction game. Performed complete refactoring of the netcode and UI.

Itch.io Tag Explorer

Developer Tool | Author

Built a public web tool for researching itch.io tag rankings and game discoverability. Helps developers analyze visibility across tags with cached updates.

Daisho: Survival of a Samurai

Action RPG | Senior Dev

Action RPG set in Japanese setting. Developed UI systems and in-game events.

KEY ACHIEVEMENTS

- ✓ Created own UI framework (Sharp Compose) with focus on performance and flexibility
- ✓ Led team management and task decomposition in multiple projects
- ✓ Implemented Gitflow and code review practices across teams
- ✓ Authored multiple Unity libraries and tools
- ✓ Successfully shipped multiple AAA and indie games
- ✓ Achieved 8th place in Ludum Dare 56 Compo with KingdomOS, a solo Unity game built in 48 hours
- ✓ Expert in complex UI architecture (MVU/MVP/MVVM patterns)
